

BRAND IDENTITY · STYLE GUIDE · 2026

Marc Alexander

MBA

Senior Director · Data & Analytics
Business Intelligence · San Diego, CA

**“I build data organizations that actually deliver —
from the architecture up to the boardroom.”**

Version 1.0 · April 2026

Brand Positioning

Who Marc Alexander is and what he stands for

“I build data organizations that actually deliver — from the architecture up to the boardroom.”

The one-line position. Use verbatim or riff on it — never lose the specificity.

BRAND ARCHETYPES

The Builder

Primary archetype

Consistently arrives at greenfield or broken situations and builds something that works. Every career story proves this pattern. The portfolio-a-week habit is live, ongoing evidence.

The Technical Executive

Secondary archetype — genuinely rare

Rare because he can do both. Most directors can't write dbt models; most senior analytics engineers can't run a governance board. Marc can do all of it in the same week.

WHAT MARC IS NOT

- ✗ Not a pure manager who delegates all technical work
- ✗ Not a pure IC who can't lead teams or set strategy
- ✗ Not a specialist in one industry or one tool
- ✗ Not someone who maintains mature orgs — he builds and fixes

WHAT MAKES HIM A COMPELLING HIRE

- **Rare combination:** Can architect the stack AND lead the team AND present to the board
- **Proven track record:** Delivered in healthcare, fintech, ed-tech, ad-tech, manufacturing
- **Engineering discipline:** Six Sigma Black Belt + IE background gives process rigor most analytics leaders lack
- **Talent developer:** Analysts who work for him grow in skill and earning potential
- **Certified depth:** dbt, Snowflake, Tableau, Alteryx — certifications prove the technical skills are real

Color Palette

Five colors. No exceptions. Applied consistently across every brand surface.

Brand Navy

#1E2F4D · RGB 30, 47, 77

Primary headings, navigation bar, section accents. The anchor of the palette.

Brand Teal

#2B7A6F · RGB 43, 122, 111

CTA buttons, hover states, active links, accent lines. The action color.

Brand Slate

#4A5568 · RGB 74, 85, 104

Body text, secondary headings, supporting information. Readable and restrained.

Brand Light

#F7F8FA · RGB 247, 248, 250

Page backgrounds, alternating section fills, card interiors. Creates breathing room.

White

#FFFFFF · RGB 255, 255, 255

Cards, header backgrounds, clean content surfaces. The foundation everything sits on.

APPROVED COLOR COMBINATIONS

Primary CTA	Nav / Header	Body Text	Alt Section	Hover State
Teal / White	Navy / White	White / Slate	Light / Navy	Navy / Teal

COLORS THAT DO NOT BELONG IN THIS BRAND

Neons, pastels, red/orange accents, dark backgrounds for primary content surfaces, or any color not in the five above. When in doubt: navy, teal, slate, light, white. That is the complete palette.

Typography

One typeface. Every weight and size has a purpose.

PRIMARY TYPEFACE

Inter

Google Fonts · Free · fonts.google.com/specimen/Inter

Fallback stack: system-ui, -apple-system, Helvetica Neue, Arial, sans-serif

Rationale: Executive and technical at once. Exceptional legibility at every size. Dominant in data/tech products.

TYPE SCALE & HIERARCHY

H1 — Hero / Page Title

Marc Alexander

H2 — Section Heading

The Track Record

H3 — Card / Role Heading

MedImpact Healthcare

Eyebrow / Label

CAREER TIMELINE · UPPERCASE · TEAL · TRACKED

Body — Primary

Built the analytics function from zero and delivered measurable business outcomes.

Body — Secondary

Supporting detail, metadata, dates, caption text.

Code / Monospace

```
src/data/projects.json · npm run build
```

FONT WEIGHTS IN USE

400 Regular

Body copy, descriptions, secondary information

500 Medium

Navigation links, badge text, supporting labels

600 Semibold

Card titles, sub-headings, button labels

700 Bold

Section headings, company names, proof points

800 Extrabold

Hero name and page-level headlines only

Voice & Tone

How Marc sounds across every channel — specific, confident, and human.

FIVE CORE VOICE PRINCIPLES

1 Confident, not arrogant

State outcomes and scope directly. No hedging, no disclaimers. The numbers speak — quote them.

EXAMPLE: “Led post-acquisition integration, eliminating >\$1M in redundant licensing.”

2 Practitioner's voice

Specific tool names, dollar amounts, percentages, team sizes. Vague executive-speak is the enemy.

EXAMPLE: “Fivetran + dbt + BigQuery” — not “modern cloud data infrastructure”

3 Teacher energy

Marc develops analysts. Content that explains how something works is authentic to who he is.

EXAMPLE: Project walkthroughs, dbt tutorials, “how I think about X” posts

4 No buzzword soup

“Data-driven” and “actionable insights” are banned. If it could appear on any LinkedIn profile, cut it.

EXAMPLE: Show the stack. Show the outcome. State it plainly.

5 Direct but warm

Not a brag machine. Not falsely modest. Clear and human — like a sharp colleague explaining their work.

EXAMPLE: First-person stories. Real project context. Honest about what was hard.

DO / DON'T

DO	DON'T
✓ "Eliminated >\$1M in redundant licensing"	✗ "Drove significant cost optimization"
✓ "dbt + Fivetran + BigQuery from scratch"	✗ "Implemented a modern data stack"
✓ "\$10M field failure signal via OEE analytics"	✗ "Delivered impactful analytics solutions"
✓ "400% Tableau adoption increase"	✗ "Dramatically improved platform adoption"
✓ "Led 4 engineers and 3 analysts"	✗ "Led a cross-functional team"

Messaging & Proof Points

Verified, quantified stories. Always available. Never produce copy without one.

CORE PROOF POINTS

Proof Point	Context	Best Used When
>\$1M licensing savings	MedImpact integration	ROI, cost reduction, business impact
\$10M field failure early signal	Cue Health manufacturing	Real-time analytics, ML, manufacturing
400% Tableau adoption increase	American Specialty Health turnarounds	Platform adoption, change management, turnarounds
18% reduction in adverse student outcomes	Bridgepoint predictive model	ML/predictive analytics, social impact
300% company growth supported	Bridgepoint EDW build	Scale, infrastructure, long-term reliability
10M+ user DTC platform	Zebit BI organization	Consumer scale, fintech, credit analytics
Built from zero every time	Pattern across all major roles	The Builder narrative — use constantly
Six Sigma Black Belt + IE	Education & early career	Process discipline, engineering mindset, rigor

BANNED PHRASES — NEVER USE THESE

low-hanging fruit

Channel Strategy

Four channels, four distinct roles. One consistent brand across all of them.

Portfolio Website marc-alexander.netlify.app (hub)

The hub — all other channels point here

- Resume + career timeline
- Project case studies (add via JSON)
- Skills grid

Audience: Hiring managers, technical recruiters, anyone who Googles Marc

Tone: Executive and precise. Every word earns its place.

LinkedIn linkedin.com/in/marc4data

Recruiter magnet + thought leadership

- Project announcements linking to site
- "How I solved X" practitioner posts (3–5 paragraphs)
- Data tooling and team building takes

Audience: Recruiters, analytics leaders, hiring VPs, network connections

Tone: Slightly more personal than the website. First-person, story-driven, specific.

YouTube [@marc4data](https://twitter.com/marc4data)

Technical depth + teaching credibility

- "I built this in a week" project walkthroughs
- dbt/Snowflake/BigQuery tutorials for analysts
- "How I think about X" strategy content

Audience: Data practitioners leveling up, analytics engineers, employers vetting skills

Tone: Teacher energy. Casual but precise. Screen + voice is enough. Clean audio > fancy editing.

X / Twitter [@marc4data](https://twitter.com/marc4data)

Building in public + community presence

- Short takes from active projects
- Replies and threads in the data community
- Links to YouTube and LinkedIn posts

Audience: Data engineering community, analytics practitioners, casual network

Tone: Most casual channel. Can be more direct and unfiltered. Still on-brand.

Imagery & Design Elements

What the brand looks like in practice — photography, layouts, and visual components.

PHOTOGRAPHY GUIDELINES

- ✓ Professional headshot (in assets/). Use consistently as the face of the brand across all channels.
- ✓ Workspace and screen shots for project content — authentic, not staged.
- ✓ Data visualizations used as design elements: charts, timelines, pipeline diagrams.
- ✓ Clean, well-lit imagery that conveys focus and professionalism.
- ✗ No generic stock photos of “data people” — abstract graphs, handshakes, lightbulbs, etc.
- ✗ No dark or moody photography — the brand is light, clean, and professional.
- ✗ No low-resolution images. Always use the highest quality version available.

RECURRING VISUAL ELEMENTS

- **Teal vertical accent line:** Signature element in the career timeline. Creates visual rhythm.
- **Teal-to-Navy gradient bar:** Top border on project cards. Depth without drama.
- **Floating credential badge:** Small white card anchored to the headshot. Shows certifications at a glance.
- **Eyebrow / section labels:** All-caps, teal, 7–8pt, wide tracking above every heading. Orients the reader.
- **Light section alternation:** White → Brand Light → White — creates rhythm without borders.
- **Rounded card corners:** 6–8px radius consistently. Professional without being rigid.
- **Skill chip / badge style:** White fill, light border, slate text. Never colored chip backgrounds.
- **Teal bullet dots:** Small filled circles in brand teal replace standard bullet glyphs.

LINKEDIN BANNER — SPECIFICATION: 1584 × 396 PX

Marc Alexander, MBA

Sr. Director · Data & Analytics · Business Intelligence

dbt Certified · Snowflake Certified · Tableau Certified · Six Sigma Black Belt

Navy background · Inter Bold · Teal accent bars

YOUTUBE THUMBNAIL TEMPLATE — 1280 × 720 PX

I Built This In One Week

dbt + BigQuery + Claude API

@marc4data

Template rules:

- Navy background always
- Teal header bar at top
- White bold headline (2 lines max)
- Teal tool / tech subtitle
- Handle in bottom-left corner
- Inter Bold throughout

Quick Reference Card

Keep this page open when producing any brand content.

COLORS

TYPOGRAPHY

H1 Bold 28–42pt · Navy
H2 Bold 18–22pt · Navy
H3 Bold 13–14pt · Navy
Body Regular 10–11pt · Slate
Label BOLD 7–8PT ALL-CAPS TEAL TRACKED

BANNED PHRASES

- ✗ data-driven
- ✗ actionable insights
- ✗ leveraged synergies
- ✗ move the needle
- ✗ deep dive
- ✗ circle back

DESIGN CHECKLIST

- ✓ Light background only (no dark sections)
- ✓ Brand teal for all CTAs and hover states
- ✓ Inter font — no decorative fonts
- ✓ Plenty of white space — don't cram
- ✓ Headshot: always professional, always same image
- ✓ Proof point in every piece of copy

PROOF POINTS (ALWAYS HAVE ONE READY)

- >\$1M licensing savings · MedImpact
- \$10M field failure signal · Cue Health
- 400% Tableau adoption · American Specialty
- 18% better student outcomes · Bridgepoint
- 300% company growth · Bridgepoint
- 10M+ user DTC platform · Zebit
- Data org built from zero · every major role
- Six Sigma Black Belt · engineering mindset

CHANNEL AT A GLANCE

Website: Executive precision. JSON-driven. The hub.

LinkedIn: 2–3×/week. Story posts. Link to site.

YouTube: Project walkthroughs. Clean audio. ~2–3/month.

X/Twitter: Building in public. Community replies. Link out.

POSITION STATEMENT — MEMORIZE THIS

**“I build data organizations
that actually deliver —
from the architecture
up to the boardroom.”**

Use verbatim. Never lose the specificity.

BRAND ARCHETYPES

The Builder

Every role: arrive, assess, build, deliver. The portfolio proves it in real time.

The Technical Executive

Can write the dbt model AND run the governance board. Genuinely rare.
