

MARC ALEXANDER, MBA

Sr. Director, Global Analytics

San Diego, CA • (858) 395-1437 • marc4data@gmail.com • [LinkedIn](#) • [Tableau Portfolio](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Analytics executive with a consistent record of building and scaling enterprise BI and analytics organizations from the ground up — across healthcare, manufacturing, fintech, higher education, and digital advertising. Specializes in translating complex, multi-source data environments into governed, trusted analytics platforms that drive executive decision-making at scale. Brings structured data strategy, cross-functional leadership, and a proven ability to align analytics delivery to enterprise growth objectives.

Delivers the full analytics lifecycle at every engagement: commercial analytics strategy and KPI architecture, data warehouse design, Power BI and Tableau platform delivery, predictive analytics model development, and data governance frameworks. At MedImpact, led post-acquisition integration of two healthcare analytics environments onto a unified next-generation architecture, eliminating >\$1M in redundant licensing while maintaining data quality. At Zebit, built commercial analytics capabilities covering acquisition, credit risk, and lifetime value modeling for a national direct-to-consumer platform serving 10M+ users.

Drives analytics as a strategic business growth lever — applying machine learning and predictive modeling to proactively identify risk and opportunity. At Bridgepoint Education, predictive models reduced adverse student outcomes by 18%. At MAKO, delivered real-time commercial analytics supporting a nationwide programmatic media buying operation. Extensive healthcare data experience across PBM, managed care, and specialty health environments provides strong foundation for medical device commercial analytics leadership.

AREAS OF EXPERTISE

Enterprise Analytics & BI Organization Leadership | Commercial Analytics Strategy | Data Strategy | KPI Architecture | Data Governance | Data Quality Frameworks | Executive Reporting | Power BI | Tableau | Looker | Python | SQL | Predictive Analytics | Machine Learning | Statistical Modeling | Data Warehouse Architecture | ETL Design | Modern Data Stack | Cross-Functional Stakeholder Management | Team Leadership | Organizational Development | Healthcare | Medical & Clinical Data Environments | BI Platform Architecture | Enterprise Reporting Infrastructure

CAREER HIGHLIGHTS

- Led post-acquisition analytics integration at MedImpact — unified BI and data engineering across two legacy environments, eliminated >\$1M in redundant licensing annually, and delivered a next-generation consolidated platform on schedule.
- Built the analytics engineering function from scratch at Cue Health — selected Fivetran, dbt, and GCP as the foundation; hired and led a cross-functional team of engineers and analysts; delivered real-time manufacturing and commercial analytics for a high-growth medical device company.
- Grew and led the data organization at Zebit for five years as Senior Director — direct team leadership of Data Engineers, Analysts, and Data Scientists delivering full BI coverage across operations, marketing, and credit risk throughout the company's commercial lifecycle.
- Turned around an underperforming analytics department at American Specialty Health — rebuilt the delivery model, resolved issues with revenue-generating Tableau products, and achieved a 400% increase in platform adoption and a \$50K annual licensing reduction.
- Established the data organization at Bridgepoint Education from the ground up over eight years — building the EDW, BI infrastructure, and analytics team that sustained 300% annualized company growth.

PROFESSIONAL EXPERIENCE

Manager of Business Intelligence and Analytics

MedImpact • San Diego, CA

Nov 2024 – Present

Leading BI, Analytics, and Data Science integration for a post-acquisition organization — managing the combined team while designing and building a next-generation consolidated analytics platform.

- Assessed ETL, reporting, and analytics systems across both organizations; identified high-risk fragile components and assembled resources to stabilize critical workflows before they impacted the business.
- Designed and executed the migration plan to consolidate reporting onto a unified next-generation platform, driving >\$1M in annual licensing savings.

- Led rapid team expansion — onboarding, mentoring, and integrating new talent across multiple in-flight projects while maintaining legacy system stability.
- Challenged the legacy Data Warehouse architecture and delivered an alternative design recognized as the #1 enhancement by business stakeholders during UAT and Production rollout.

Senior Manager of Business Intelligence

Cue Health • San Diego, CA

Mar 2022 – Jun 2024

Built the data engineering and analytics function from zero — selected the technology stack, hired and led the team, and governed data quality and delivery standards across a high-growth medical device company.

- Architected the full modern data stack — selected Fivetran, dbt, and GCP/BigQuery; directed implementation; and established data quality standards, alerting systems, and operational playbooks.
- Oversaw integrations with 12+ source systems including NetSuite, Salesforce, Shopify, IQVIA SmartSolve, Google Analytics, and manufacturing data feeds, ensuring comprehensive analytics coverage.
- Led integration of data from 12+ manufacturing cells into the data lake, enabling OEE analytics and the real-time visibility that identified and resolved a \$10M field failure issue.
- Built and governed predictive analytics and ML capabilities — customer segmentation, LTV scoring, cohort attrition, marketing optimization, and system health monitoring.
- Established a Data Governance Board, project prioritization framework, and cross-team coordination model that scaled with the organization.

Senior Director of Business Intelligence

Zebit • San Diego, CA

Jun 2017 – Mar 2022

Built and led the data organization as Senior Director for five years — managing Data Engineers, Analysts, and Data Scientists while owning the company's BI strategy and infrastructure.

- Formulated the company Data Strategy and stood up the Data Governance Board — establishing the prioritization and accountability frameworks that scaled with rapid commercial growth.
- Designed and oversaw implementation of the enterprise data warehouse and pipeline — establishing data quality and reliability standards that supported the full business lifecycle.
- Managed a team delivering analytics across marketing performance, customer acquisition and conversion, LTV, and business liquidity calculations for creditors.
- Directed the design of a custom Magento-to-NetSuite integration — a high-volume, spike-tolerant data pipeline built for peak retail traffic loads.
- Established and enforced BI delivery standards across Tableau Online, Python, and R — raising the quality and consistency of all analytical outputs organization-wide.

Associate Director of Analytics

American Specialty Health • San Diego, CA

Jun 2016 – Jun 2017

Promoted from individual contributor to Associate Director — rebuilt the analytics function and turned around underperforming revenue-generating Tableau products.

- Overhauled Tableau licensing and delivery strategy, saving \$50K annually and achieving a 400% increase in end-user adoption and engagement.
- Managed analytics and BI teams across California and Indiana, establishing delivery standards and performance management practices.

Director of Business Intelligence

MAKO-Labs • San Diego, CA

Jan 2014 – Jan 2016

Built the Business Intelligence program from zero at a high-growth internet startup — established the team, technology, and delivery model.

- Led a team building the core data pipeline: converting high-volume web logs into structured analytics datasets powering dynamic Tableau dashboards.
- Designed and deployed a Go/No-Go Decision Tool that optimized marketing ROI against user acquisition funnels — directly supporting budget allocation decisions.
- Transformed a fragile ETL system into a reliable, monitored pipeline, eliminating data accuracy and timeliness issues across the organization.

Director of Data Analytics

Bridgepoint Education • San Diego, CA

Feb 2006 – Jan 2014

Established and led the analytics and BI function over eight years — building the team, data warehouse, and reporting infrastructure that supported a university through 300% annualized growth.

- Co-designed and built the Enterprise Data Warehouse — authoring the ETL framework, data model, and compliance reporting infrastructure for a large-scale online university.
- Designed and implemented a predictive analytics program that identified students at high risk of academic failure, enabling targeted counselor interventions to improve retention.
- Managed Tableau Server and analytics infrastructure for thousands of users across diverse academic and operational departments.

ADDITIONAL EXPERIENCE

Business Intelligence Engineer | Senior Database Administrator • Bridgepoint Education, San Diego, CA

Database Engineer • Eaton Powerware, San Diego, CA

Manufacturing Engineer • Qualcomm Personal Electronics, San Diego, CA

Industrial Engineer • Argent Consulting, Oklahoma City, OK

EDUCATION

Master of Business Administration (MBA) • Ashford University • San Diego, CA

Bachelor of Science in Industrial Engineering and Management • Oklahoma State University • Stillwater, OK

CERTIFICATIONS & TRAINING

Certifications: CBIP (Business Analytics), dbt Certified, Snowflake Certified, Tableau, Alteryx, Six Sigma Black Belt, Scrum Master

Training: Data Mining at UCSD, Data Analytics at Johns Hopkins, TDWI, Development Patterns with R by Hadley Wickham, AI Sessions at Google, Management & Leadership Development Programs

TECHNICAL EXPERTISE

Leadership: Team Leadership, Organizational Design, Cross-Functional Management, Executive Stakeholder Management, Agile/Scrum

Analytic Tools: Tableau, Looker, Power BI, Alteryx, BigQuery, R, Python, SSRS, Superset, Hex

Data/Analytics: Business Intelligence, Predictive Analytics, Statistical Analysis, Machine Learning, AI/LLM Integration, Modern Data Stack, Data Governance, Data Strategy, Executive Reporting

Data Engineering: Fivetran, dbt, Snowflake, SQL, SSIS, Talend, AWS, GCP, git

Administration: Tableau Server, Tableau Online, Alteryx Server, Snowflake, MSSQL, MySQL
